

**AUTOMATION AT NORTHROP**—A giant 54-ton milling machine capable of manufacturing high-precision parts in one continuous operation which formerly required many set-ups and costly templates, has been installed by Northrop Aircraft, Inc., at its Northrop Division plant in Hawthorne. It is the first such machine to be put into operation on the West Coast. The massive, \$350,000 machine, manufactured by the Kearney and Trecker Co., Milwaukee, operates a number of intricate cutting and milling techniques from a thin, one-inch wide plastic roll of tape. The tape is fed into a projector-like mechanism which transmits data to electronic devices controlling the operation of the machine. The tool is known as a "numerically-controlled" profile milling machine and is a part of the Air Force and Northrop long range plan to obtain advanced weapons systems economically. Northrop President Whitley C. Collins (right) is shown explaining the operation to Lieutenant General Clarence S. Irvine, Air Force Deputy Chief of Staff for Materiel during a visit to the aircraft plant recently.

## Community Chest Drive Opens in City Plants

Solicitation among employees in Commerce and Industry for the 1956-58 Community Chest campaign began October 15, under the slogan, "Give the Most Where You Get the Most Out of Giving." Glenn Koger, city chairman for Torrance, announced today.

Koger said, "When you give to the Chest, you give to 167 health and welfare services. You get the most mileage for your costs are 8.6 per cent of the total funds, lower than any other comparable campaign. Eighty cents out of every dollar goes to help children."

Chest dollars provide for 20 hospitals and clinics working year around, 45 youth services, including Scouts, clubs settlements, 34 child care services for homeless and neglected children, and 50 services available to help families in trouble. One out of every three families get direct help from some Chest service.

The Payroll Giving Plan provides any employee with the opportunity to make a pledge and pay his donation to the Community Chest over a given period of time by deductions from his salary each pay period.

## Harvey Aluminum Plans New Cargo Unloading System

Harvey Aluminum has completed arrangements for the freight of raw material from the Far East for the company's aluminum reduction plant at The Dalles, Oregon, it was announced this week by Lawrence A. Harvey, executive vice-president.

Under the terms of the company's charter contract with a joint venture of three Canadian firms, The Dalles, Oregon plant on the Columbia River 190 miles inland from the sea, is established on a permanent basis as a regular seaport of call for bulk cargo carrying ocean-going vessels. Harvey has chartered approximately 13 cargoes a year for a period of five years.

The carriers will load their cargo of alumina alternately in the ports of Shimizu and Niihama, Japan, and will discharge the cargo at a Columbia River dock now under construction at the company's plant site just northwest of The Dalles, Oregon.

To facilitate this movement, Harvey Aluminum has designed and is constructing a large unique barge-mounted pneumatic unloading system which will suck the alumina from the ship's holds and pump it to shore-mounted storage silos.

MRS. S. PYNE (L) AND MRS. B. MOYER (C) receive 5-year service pins from Mrs. William Cochran, liaison chairman for the local branch of the Red Cross. Press Photo.

## Red Cross Awards Pins

The American National Red Cross 5 year service pin was awarded to three Torrance women this week.

Mrs. William Cochran, liaison chairman for the local branch office, presented pins to Mrs. W. Walton, Mrs. B. Moyer and Mrs. S. Pyne, and congratulated them on the contribution they have made to the community through local Red Cross service.

The Torrance branch of the Red Cross needs many more volunteers to meet the growing demand for service, due to the rapid increase in population in the area.

Volunteers are badly needed to fill the following positions: a Staff Aide, staffing the local branch office 2 hours a week, blood banks, both civic and in-

Two typist, to do typing at the center. Blood donor room aides, to assist the nurse and the donor. Canteen workers, to serve juice and coffee. Interested persons may call the local Red Cross office, FA 8-0510.

Donna Reed stars in mystery series "Suspicion" Monday night on Channel 4

## TENSE DRAMA IN "OTHER SIDE OF THE CURTAIN"

By GENE INGE

This Monday evening at 10 on Channel 4 the third episode of Suspicion presents the story of a woman, who attempts to seek relief from haunting dreams, puts her on trial for her life.

Donna Reed, as Letty Jason, portrays the leading role in "The Other Side of the Curtain," a psychological mystery story by Helen McCloy, adapted for television by James P. Cavanagh. Miss Reed, winner of Motion Picture Academy Award for her role in "From Here To Eternity," is the third dramatic star to be selected for the leading role in the Suspicion series. Each week a different outstanding personality in the field of acting will head the cast.

Recurring nightmares about a mysterious impenetrable curtain drive Letty Jason and her husband, Ralph

(played by Jeff Richards), to seek psychiatric aid. Their inquiries arouse suspicion of Dr. Edwards (Herbert Anderson) and leads to Letty being tried for the mysterious death of Ralph's first wife.

Suspicion, a new series, each week features a story written by a well known writer, selected for the ability to "fascinate, mystify and suspend."

Dennis O'Keefe appears as host to introduce each program. Alfred Hitchcock and other prominent directors participate in the production of the plays. James Neilson is the director, and William Frye, producer, for this Monday evening's presentation. Besides Miss Reed a large supporting cast includes many of Hollywood's actors and actresses, including Ainslee Pryor, Simon Scott, Harold Stone, David Hoffman, Ruth Lee, Junej Ellis, Barbara Townsend, Kay Stewart and Lewis Martin.
